### **PARTNERSHIP**

"To partner with governmental and commercial entities in realizing strategic food security and achieving long-term growth and sustainability"

## OUR PRODUCTS

### Sesame

Sesame (*Sesamum indicum*) is a flowering plant in the genus *Sesamum*. The precise

Natural origin of the species is unknown, although numerous wild relatives occur in Africa and a smaller number in India. It is widely naturalized in tropical regions around the world and is cultivated for its edible seeds.

We trade 10,000 MT of sesame of Burkina Faso and Nigeria origin (Kano) which we ship to China, Turkey and Japan. We have upcountry cleaning facilities that ensure that the product quality standards are adhered to.

### Cashew

The Cashew (*Anacardium occidentale*) is a tree in the flowering plant family Anacardiaceae. The plant is native to northeastern Brazil. It is now widely grown in tropical climates for its cashew "nuts" and cashew apples. The true fruit of the cashew

tree is a kidney or boxing-glove

Actually the drupe develops first on the tree, and then the peduncle expands into the pseudo-fruit. Within the true fruit is a single seed, the cashew nut.

Our success in the cashew business has arisen out of developing a Multi-Origin, Multi-Destination & Multi-Level sales strategy. We buy from different origins and sell into India, Vietnam and Brazil on FOB, CIF or High Seas Sales Basis. We are present in Ivory Coast, Nigeria, India, Benin, Burkina Faso & Guinea Bissau.

Our direct access to the processors in India, Vietnam and Brazil gives us a wide base of clients who gives us off-take for our annual volumes of 25,000 MT. We have a dedicated team of expert quality controllers who have origin specific knowledge about the product. We also have a team at each destination to control the logistics and quality.

## **Cocoa**

Cocoa is the dried and partially fermented fatty seed of the cacao tree from which

chocolate is made. "Cocoa" can often also refer to the drink commonly known as hot chocolate cocoa powder, the dry powder made by grinding cocoa seeds and removing the cocoa butter from the dark, bitter cocoa solids; or it may refer to the

combination of both cocoa powder and cocoa butter together.

We are one of Ivory Coast's & Nigeria's most cost-competitive originators and exporters of cocoa. We have a strong marketing and trading presence in West Africa and our annual volume of 30,000 MT is delivered to the factory gates of our

clients. In both Ivory Coast and Nigeria we have built upon our origination strengths to secure the cocoa bean supplies for chocolate industry.

We are intensively involved in farm-gate procurement. Our objective is to profitably procure economically feasible lots by getting to the grass roots level. This gives us better control of quality and supply.

### **Shea Nut**

Sheanut is used to manufacture shea butter which is a slightly yellowish or ivory-

colored natural fat extracted from fruit of the sheatree by crushing and boiling.

Shea butter is widely used in cosmetics as a moisturizer and an emollient.

Shea butter is also edible. It is used as a cooking oil in West Africa, as well as sometimes being used in the chocolate

industry as a substitute for cocoa butter.

Our annual volumes of 7,500 MT of sheanuts are competitively sourced out of Ivory Coast, Burkina Faso, Benin and Nigeria.
